COLLECTION

Natural Onyx

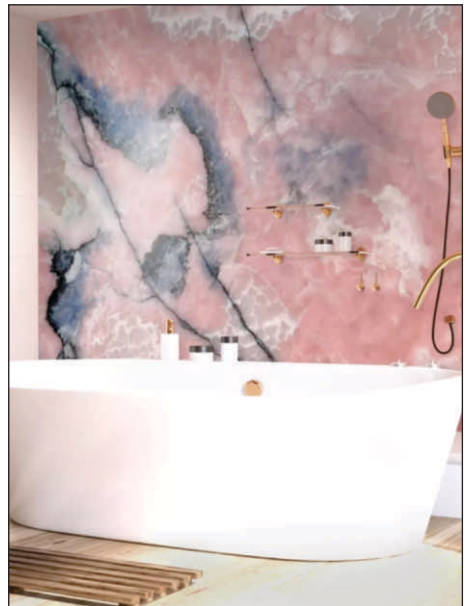

Natural Onyx is a unique and opulent stone that gives an exquisite and breathtaking finish to your interiors. This stunning stone is a popular choice due to its deluxe nature and gorgeous colours. Natural Onyx has a regal and elegant effect on the appearance of your abode.

The exotic stone is known for a variety of reasons but its striking colours, opulence, rarity and glinting features top the list.

Exotic Marble

Marble is a gorgeous natural stone that comprises re-crystallized carbonate minerals known as calcite or dolomite. Since marble is porous, it makes marble softer; as compared to other natural stones. The aesthetically pleasing beauty is one of the most desirable natural stones for interior design. Due to its alluring patterns, it can turn any ordinary space into a work of art.

Marble is finite and durable; it gives a luxurious finish to any space and adds value to your home. Marble curates beautiful architectural structures, sculptors and statues

Semi Precious Stones

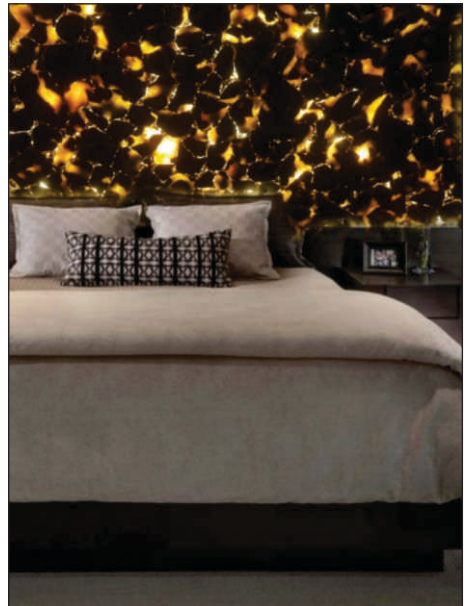

Semi Precious Stones are elegant, classy and rare that adds beauty and perfection to any interior application of your house. Our Semi Precious Stones are true work of art and adds a statement to your interiors. The luxurious slabs add value to your home and are sourced from countries such as; Brazil, Africa, Iran, Vietnam, Indonesia along with others.

The exquisite and magnificent Semi Precious Stones are known for their elegance and sophistication that adds the ultimate touch of beauty. These gorgeous stones have been highly admired for a long time and are processed at our exclusive German technology facility in Kishangarh.

Granite

Granite is an incredible natural stone that is porous. It is one of the oldest rocks and comprises minerals such as quartz and feldspar. Granite is popular for its availability and affordability. There are many types of granite available in the market; however, each has its unique charm. We source the granite from Brazil, Greece and India; they come in several styles and colours. The igneous rock is one of the hardest; materials found in the world. It is durable, scratch-proof, stain proof and heat resistant.

Granite is a popular choice for outdoor and indoor projects that include; buildings, monuments, bridges, driveways, countertops, floors, furniture tops, etc.

MARBLE

Marble is a gorgeous natural stone that comprises re-crystallized carbonate minerals known as calcite or dolomite. Since marble is porous, it makes marble softer; as compared to other natural stones. The aesthetically pleasing beauty is one of the most desirable natural stones for interior design. Due to its alluring patterns, it can turn any ordinary space into a work of art.

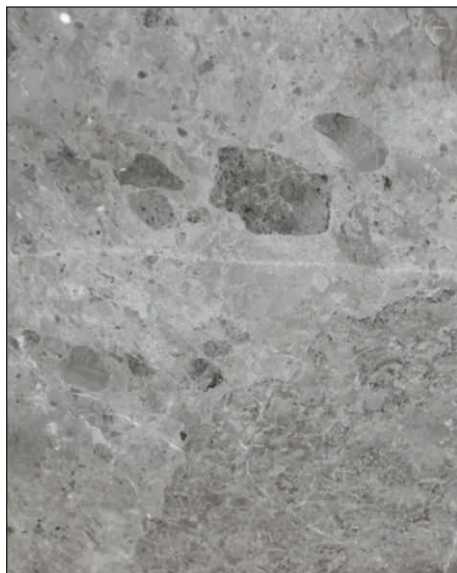

Marble is finite and durable; it gives a luxurious finish to any space and adds value to your home. Marble curates beautiful architectural structures, sculptors and statues. Marble is a popular choice for adorning kitchen countertops because of its ability to withstand heat. However, you have to be careful as placing hot items directly on the marble could lead to discolouration or even burn the surface. Now, you can bake to your heart's content; but remember to keep metallic items and staining agents away as marble is not stained or scratch resistant.

Curated from countries like Italy, Spain, Brazil, Turkey, Africa, Tunisia, Greece and Vietnam, the eternal beauty symbolises purity and immortality. The Taj Mahal is the perfect example of a beautiful structure to be sculpted with marble. Apart from luxurious exteriors and kitchens, you can use marble on floors, walls, bathrooms and tabletops.
